concrete poker vibrators

▶▶ IAN DICKIE CONCRETE POKER VIBRATORS

The VMP poker vibrators are high frequency units for effective consolidation of concrete. The VMP has a high vibration output at low service and maintenance cost. VMP pokers incorporate the pendulum design principle of low rotation speed of the flexible shaft and high frequency in the vibrator tube.

Highest quality is guaranteed as latest technologies, precision CNC engineering, metallurgical treatment methods and stringent quality control are exercised at the IAN DICKIE & CO. factory. All exposed steel components are tempered. The vibrator tube and end cap are manufactured from specially tempered steel allowing highest resistance to wear. Polyurethane caps are available on request.

Specifications

Model	ZN 25	ZN35	ZN50	ZN60
Tube Diameter (mm)	25	35	50	60
Head Length (mm)	410	400	470	400
Amplitude (mm)	0.8	1.0	1.15	1.25
Frequency (vibr/min)	12000	12000	12000	11000
Weight (Kg)	10.7	14.5	20.7	21.5
